

Tips and Tricks #1

Clearing Browser Cache and Cookies

Quick cache clearing in Google Chrome:

1. Press **F12** to open **Developer Tools**.
2. Right-click the **Refresh** icon (usually located in the upper-left area next to the address bar).
3. Select "**Empty Cache and Hard Reload**".

This method clears the cache only for the current page, which is useful for developers and testing purposes.

Clearing Cache and Cookies for the Entire Browser

1. Open the browser menu (the three dots in the upper-right corner).
2. Go to **Settings > Privacy and Security > Clear Browsing Data**.
3. Select "**Cookies and other site data**" and "**Cached images and files**".
4. Click "**Clear Data**".
