

Order information in foreign language

Because clients and suppliers are from different countries, documents often need to include information in a foreign language.

Ozols TMS allows translation in client's language, for example content of invoice - **Type of service; VAT rate explanation; Payment term**

How to translate information into the client's language?

1. Translation is possible for fields that have a symbol  on the right side. It opens a window where you can enter the required translation.

Service type translation into a foreign language

1. **OZOLS > Payments > Lists > Service types**
2. Choose the service that needs translation
3. Press the translate button 
4. Fill in the translation in corresponding language
